CDF and State Fire Marshal Remind Californians: Change Your Clocks – Change Your Battery

Sacramento- CDF and the Office of State Fire Marshal is reminding all Californians to replace batteries in smoke detectors when turning clocks forward this weekend.

“We know smoke detectors save lives but they don’t work unless a working battery in place,” said Ruben Grijalva, acting director of CDF and the California state fire marshal. “It takes just a few seconds to replace that battery, and it could be the difference between life and death.”

"The “Change Your Clock, Change Your Battery” campaign can save your family," said Chief Grijalva. "Before you go to bed this Saturday night, turn the clock forward one hour, and replace the battery in every smoke detector in your home. Then you can sleep soundly knowing that you've provided one of the best ways to protect your family from fire."

Every year lives are lost in homes where there is no smoke detector, or a non-functioning smoke detector. According to the National Fire Protection Association (NFPA), the households with non-working smoke detectors now outnumber those with no smoke detectors.

“Daylight-saving time is an easy way to remember to do this very important task,” adds Chief Grijalva. “I urge everyone to change their batteries in their smoke detectors every six months. Remember, almost every day a smoke detector saves somebody’s life. It’s up to you to protect yourself and your family.” Find more information at www.fire.ca.gov.
